NAMED VARIETIES IN LINING OUT STOCKS

Our lining out stocks of Camellias are well rooted stocks and in healthy condition, and true to name. When a variety is sold out, substitution will not be made without consent of purchaser.

We particularly recommend our grafted plants. D&D grafts are made on 2 year potted stocks, and are stocky and healthy, with a running start on cutting grown stocks of the same age.

All potted plants are transferred to paper pots and carefully packed, with packing costs waived when cash accompanies order.

Catalog space will not permit of listing the many varieties which we grow. A supplementary list will therefore be issued, about December 1st, offering additional varieties.
